PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive, multi-page and single-page web applications using HTML5, CSS3, JavaScript, and React.js. Independently designed, built, and deployed five personal projects covering component-based UI architecture, client-side routing, and responsive design across devices. Currently strengthening technical skills through ongoing Frontend Development training at Route Academy, where recognized as a Top Performer. Looking to bring a strong project-building foundation and a fast-growing skill set to a React.js-focused development team.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, C, C++

Frontend Development: HTML5, CSS3, Bootstrap, Tailwind CSS, React.js, React Router, Responsive Web Design

Tools & Version Control: Git, GitHub

PROJECTS

Assignment 10 — Responsive Portfolio Landing Page

Live Demo: jubaabdullah.github.io/assignment10 | *GitHub:* github.com/JubaAbdullah/assignment10

- Built a fully responsive single-page landing template using HTML5 and Tailwind CSS utility classes.
- Implemented a dark/light theme toggle and accessible, semantic markup with ARIA labels and RTL (right-to-left) layout support.
- Version-controlled the project with Git and deployed it via GitHub Pages.

Online Store — E-Commerce Front End

Live Demo: jubaabdullah.github.io/online-store | *GitHub:* github.com/JubaAbdullah/online-store

- Built a multi-page online store interface using HTML5, CSS3, and vanilla JavaScript, including a dedicated checkout page.
- Structured product data in a JSON file and used JavaScript to dynamically render the product catalog for responsive, cross-browser browsing.
- Version-controlled the project with Git and deployed it via GitHub Pages.

React Portfolio — Personal Developer Portfolio (React.js)

Live Demo: react-portfolio-dun-six-36.vercel.app | *GitHub:* github.com/JubaAbdullah/react-Portfolio

- Built a personal developer portfolio as a single-page application using React.js and Vite, structuring the UI into reusable, component-based sections.
- Integrated EmailJS for a functional client-side contact form and react-icons for a consistent icon system; configured ESLint for code quality.
- Implemented a fully responsive layout across breakpoints; managed version control with Git/GitHub and deployed to Vercel.

Tasty Burger — React Restaurant / Food Ordering Website

Live Demo: tasty-burger-lovat.vercel.app | *GitHub:* github.com/JubaAbdullah/tasty-burger

- Developed a multi-page React.js website using Vite, implementing client-side navigation between pages with React Router.
- Styled the interface with Bootstrap, React-Bootstrap components, and Bootstrap Icons, and structured the app into modular, reusable components.
- Managed source control with Git/GitHub and deployed the live site to Vercel.

React Business — Responsive Business Landing Page (React.js)

Live Demo: react-business-sooty.vercel.app | *GitHub:* github.com/JubaAbdullah/react-business

- Built a responsive business/company landing page with React.js (Create React App), organizing the UI into modular, reusable components.
- Implemented smooth in-page navigation using react-scroll and integrated FontAwesome icons; designed the layout to adapt across all viewports.
- Version-controlled the project with Git/GitHub and deployed it to Vercel.

EDUCATION

Cairo University — Faculty of Commerce, Business

Third-Year Student | Expected Graduation: 2028

TRAINING & CERTIFICATIONS

Route Academy — Frontend Development (Currently Enrolled / In Progress)

- Recognized as a Top Performer in Frontend Web Development.

C Programming Course — Gammal Tech

- C Programming Certificate, Gammal Tech — September 28, 2025

LANGUAGES

English — B1
